Leadership Awards and Buildings Directory!

Peninsula Clean Energy invites designers, builders, developers and owners of all-electric residential and commercial buildings to submit their projects to the Peninsula Clean Energy All-Electric Leadership Awards and Buildings Directory.

The directory and awards program showcases leadership and innovation in modernized or newly constructed buildings with 100% of energy loads electrified.

Submitted projects will be reviewed by Peninsula Clean Energy's building experts and added to the interactive directory where users can search and sort based on factors such as location, building size and building type.

Projects may also be submitted to the All-Electric Leadership Awards Program! Projects submitted to the awards program will undergo a review process facilitated by a selection panel of state and regional building design and electrification experts. Projects will be evaluated based on leadership, innovation, building energy impact, building design and operations and quality of the application narrative.

To be considered for the 2022 All-Electric Leadership Awards Program, project must be submitted by November 17, 2021. More about the awards program on the next page.

Awardees Receive: a customized plaque and a \$2,000 cash award

NOTE: Buildings are accepted to the directory on an ongoing basis but to be included in the 2022 Awards Program, your project must be submitted by **November 17, 2021.**

Peninsula Clean Energy All-Electric Building Leadership Awards

The Peninsula Clean Energy All-Electric Leadership Awards invites designers, builders, developers and owners of all-electric, high performance residential and commercial buildings in San Mateo County to submit projects for awards.

Award categories include:

All-Electric Commercial Leader:

Spotlights a commercial or multi-family residential project that demonstrates leadership by fully electrifying all buildings loads. Eligible projects must be fully electrified projects in construction or in process and must be located or planned to be located in the County of San Mateo. Completed projects as well as those with finalized designs or currently under construction are eligible. Eligible commercial projects may be commercial or multi-family residential buildings and may be new construction or renovated projects. Awards categories include:

- Commercial—Modernization
- Commercial—New Construction

All-Electric Residential Leader:

This award spotlights a residential project that demonstrates leadership by fully electrifying all building loads. Submitted projects must be completed, with 100% of energy loads electrified. Projects that are still in planning or construction are not eligible at this time but are encouraged to apply in the next round if they are completed at that time. Eligible projects may be single family dwellings or accessory dwelling units (ADUs) and either new construction or renovated buildings located in San Mateo County. Awards categories include:

- Single Family Residential—Renovation / Alteration
- Single Family Residential—New Construction

RESIDENTIAL PROJECTS:

Residential projects are defined as new construction or renovated structures that utilize/d the residential energy code.

COMMERCIAL PROJECTS:

Commercial projects are defined as new construction or renovated structures, including commercial and multi-family dwellings, that utilize/d the non-residential energy code.

Buildings Directory

Entry into the awards program is not required for projects submitting to the directory. If you only want your building to be counted in the directory and not considered for the awards program, select “No, just applying to be included in the All Electric Buildings Directory” as shown here:

Applying for award?*

- Yes, I am applying for the All-Electric Leader award and the Directory
- No, just applying to be included in the All Electric Buildings Directory

Submit your project to Peninsula Clean Energy for inclusion in the All-Electric Buildings Directory. Click here to get started: peninsulacleanenergy.com/all-electric-awards-2022
